

## PHOTOSENSITIVITY

Taking any of these products can cause sensitivity to the sun and darker pigmentation of the skin.

### Antibiotics

- Vibramycin (doxycycline)
- Minocin (minocycline)
- Sumycin (tetracycline)

### Anti-Cancer Drugs

- Methotrexate
- Vinblastine (Velban)
- Fluorouracil (Effudex)

### Antidepressants

- Elavil (amitriptyline)
- Norpramin (desipramine)
- Wellbutrin

### Antimicrobials

- Tetracyclines
- PhisoHex
- Bactrim, Septra

### Birth Control Pills

### Diuretics

- Diuril (chlorothiazide)
- Hygroten
- Lasix (furosemide)

### Hypoglycemics

- Glucotrol
- Orinase

### NSAID's

- Advil, Motrin, Nuprin (ibuprofens)
- Aleve, Anaprox (naproxens)
- Feldene (piroxicam)

### Tranquilizers

- Librium
- Thorazine
- Haldol
- Navane
- St John's wort

### Other:

- Psorigel (coal tar)
- Cordorone (amiodarone)
- Capoten (captopril)

### Foods

- Carrots
- Limes
- Celery
